

Sweet Crumbs

Cookies & Brownies Café

Project Proposal by Ayesha Noor Jamil

1. Concept

Sweet Crumbs is a modern online dessert café specializing in freshly baked cookies and brownies. The website provides customers with an enjoyable and interactive shopping experience where they can browse a variety of desserts, customize cookie boxes, place orders, manage their accounts, and track previous purchases.

The entire website will be developed using **HTML5, CSS3, and JavaScript**, while **Browser Local Storage** will be used to store user accounts, products, shopping carts, orders, reviews, and contact messages without requiring a backend server.

2. Color Scheme

Unlike traditional fast-food websites that use bright reds and yellows, Sweet Crumbs uses a soft bakery-inspired palette to create a warm, elegant, and premium feel.

Role	Hex Code	Color
Primary Background	#FFF8F2	Cream White
Secondary Background	#FDF1E8	Soft Vanilla
Primary Accent	#F7D6E0	Blush Pink
Secondary Accent	#E8D3C1	Warm Beige
CTA Buttons	#D8A25E	Caramel Gold
Headings	#5C3A2E	Chocolate Brown
Body Text	#6F4E37	Cocoa Brown
Success	#8AA66C	Pistachio Green

3. Functional Requirements

User Side:

Home Page

Displays a welcoming hero banner, featured desserts, Cookie of the Day, customer testimonials, and promotional offers.

Menu Page

Displays all cookies and brownies with:

- Images
- Description
- Price
- Search bar
- Category filters

Product Details

Shows complete information about each dessert including:

- Ingredients
- Calories
- Texture
- Customer Ratings
- Reviews

Build Your Own Cookie Box ★

Allows customers to build their own box by choosing:

- 4 Cookies
- 6 Cookies
- 12 Cookies

The total price updates automatically.

Brownie Customization ★

Customers can choose:

- Classic
- Extra Fudgy

- Crispy Edge

before adding brownies to their cart.

Cart

Users can

- Add Items
- Remove Items
- Increase Quantity
- Decrease Quantity

The total updates instantly.

Checkout

Collects customer details and saves completed orders to Local Storage.

Login / Registration

Users can create an account, sign in securely, and access personalized features.

User Dashboard

Provides easy access to:

- Profile
- Order History
- Wishlist
- Account Settings

Wishlist

Users can save their favourite cookies and brownies for future orders.

Contact Us

Customers can send messages or feedback which will be stored in Local Storage for admin review.

About Us

Admin can

- Add Products
- Edit Products
- Delete Products

Order Management

Admin can

- View Orders
- Update Order Status
- Delete Orders

Order statuses include:

- Pending
- Baking
- Ready
- Delivered

User Management

View registered users and delete accounts if necessary.

4. Unique Features

Instead of ordinary features, Sweet Crumbs offers several interactive elements that create a memorable bakery experience.

Build Your Own Cookie Box

Customers create their own personalized cookie assortment.

Brownie Texture Selector

Choose:

- Goopy
- Classic
- Crispy Edge

before ordering.

Bakery Dark Mode

Switch between:

 Sweet Morning Theme

 Cozy Chocolate Theme

Wishlist

Save favourite desserts.

Coupon Codes

Recently Viewed Desserts

Displays the last five desserts viewed.

Random Baking Facts

Shows a different fun baking fact every time the homepage loads.

Birthday Surprise

A birthday greeting with a small discount message for registered users.

Trending Desserts

Automatically displays the most frequently ordered desserts.

Customer Testimonials

Visitors can read reviews left by previous customers.

Smooth Animations

Soft fade-in effects, floating cards, hover animations, and elegant transitions to create a premium user experience.

5. Technology Stack

Technology	Purpose
HTML5	Website Structure
CSS3	Styling & Responsive Design
JavaScript	Functionality & Interactivity
Local Storage	Store Users, Orders, Products, Cart & Reviews
